PREFACE AND ACKNOWLEDGEMENTS

The 2015 Population and Housing Census (PHC) is the fifth modern census conducted in Sierra Leone since independence. Previous post-independence censuses were conducted in 1963, 1974, 1985 and 2004. The 2015 PHC enumeration was conducted between the 5th and 18th December 2015, with the night of the 4th and 5th December 2015 as Census reference night.

The main objective of 2015 PHC is to provide quality and timely statistical information for development planning, policy formulation and service delivery, as well as for monitoring and evaluation of development programmes and plans. Therefore, in order to facilitate proper use of the data, a set of statistical tables have been produced according to the census tabulation plan. In addition, detailed analyses of the data will be done and thematic reports will be produced for wide dissemination.

This Summary Report of the Final Results is the first in a series of publications to be released after the provisional results which were released earlier this year. It contains statistical tables which can be used by various users including Ministries, Departments and Agencies (MDAs), local Councils, development partners and the private sector to monitor progress in the implementation of development programmes, policy formulation and evidence-based decision-making.

The report presents a wide range of quality information on population and housing characteristics at the various administrative sub-divisions. It also contains data on the socio-economic impact of the Ebola Virus Disease.

The 2015 PHC would not have been possible without a massive mobilization and utilization of human, financial and material resources. We therefore wish to express our profound gratitude to the institutions and organizations that contributed to the planning,

organization, funding and implementation of the census.

We particularly wish to thank the government of Sierra Leone and its development partners, especially UNFPA, DFID, Irish Aid and UNDP for providing the funds and other logistical support required for the census. Our sincere appreciation also goes to the National Electoral Commission (NEC) for providing vehicles to support the cartographic mapping. We acknowledge the contribution of the security forces for providing the required security during the entire enumeration process.

We are grateful to the media and to civil society for publicizing the census activities, which greatly enhanced the census. We also wish to thank the chiefs and other local authorities, as well as the entire people of Sierra Leone, for their cooperation.

We are indebted to the Census Steering Committee, Statistics Sierra Leone Council, the Census Technical Committee, the Census Publicity Committee, the Census Command Center, Technical Coordinators, the District Census teams and the field personnel for the key roles they played in the census implementation. To the Chief Technical Adviser, the Data Processing Consultant, the Cartographic Experts and the Communications Specialists who were engaged in the various aspects of the census, we are most grateful. We also wish to express our sincere appreciation to the national and international monitors who monitored the census process.

Finally, we wish to express our appreciation to all staff of Statistics Sierra Leone for their dedication and commitment.

Mr. Mohamed King Koroma
Statistician General and Chief Census Officer

December 2016

CONCEPTS & DEFINITIONS

This section defines the concepts and definitions used for the Sierra Leone 2015 PHC. The concepts and definitions are provided to facilitate understanding and use of the data presented in this report. Users are therefore advised to use the results of the census within the context of these concepts and definitions.

POPULATION CENSUS

A population census is the total process of collecting, compiling, evaluating, analysing and publishing or otherwise disseminating demographic, economic and social data pertaining to all persons in a country or in a well delimited part of a country, at a specified period of time.

SEX RATIO

The sex ratio is the ratio of males to females in a given population, usually expressed as the number of males for every 100 females.

AGE DEPENDENCY RATIO

The age-dependency ratio is the ratio of persons in the dependent ages (generally under age 15 and age 65 and over) to those in the economically productive ages (15-64 years) in a population.

POPULATION PYRAMID

A population pyramid graphically displays a population's age and sex composition. Horizontal bars present the numbers or proportions of males and females in each age group. The sum of all the age-sex groups in the population pyramid sum up to 100 percent.

GROWTH RATE

The growth rate is the rate at which a population is increasing (or decreasing) in a given year due to natural increase and net migration, expressed as a percentage of the base population.

ECONOMIC ACTIVITY STATUS

Economic Activity Status refers to economic or non-economic activity of respondents during the 12 months preceding census night. Information on type of activity was collected on persons 10 years and older.

ECONOMICALLY ACTIVE PERSON (15-64 YEARS)

A person is regarded as economically active if he/she worked for pay or profit or family gain for at least 1 hour within the 12 months preceding the Census night, or available and looking for work.

NON-ECONOMICALLY ACTIVE PERSON (15-64 YEARS)

The non-economically active persons include those who did not work and were not seeking or available for work during the last 12 months preceding the census.

OCCUPATION

Occupation refers to the type of work the person is engaged in at the establishment where he/she worked during the last 12 months preceding the census.

INDUSTRY

Industry (branch of economic activity) refers to the kind of production or activity of the establishment or similar unit in which the job(s) of the economically active person was located during the last 12 months preceding the census.

LIVESTOCK

Livestock are domesticated animals raised at household level to produce commodities such as food, fibre or labour. For the 2015 Census, livestock includes goats, cattle, sheep, pigs, ducks and chicken.

GROSS ENROLMENT RATE (GER)

Total annual enrolment, regardless of age, in a school-level of education expressed as a percentage of the official school-age population corresponding to the same level of education.

NET ENROLMENT RATE (NER)

Total annual enrolment of the official age group for a given level expressed as a percentage of the total population in that age group.

LITERACY

Ability to read, write and understand in any language(s).

TOTAL FERTILITY RATE (TFR)

Total fertility rate represents the average number of children a woman would have by the end of her reproductive years according to a set of age-specific fertility rates pertaining to a particular year.

DWELLING UNIT

A dwelling unit is a room or a group of rooms normally intended as a place of residence for one household (e.g., a single house, an apartment, or a group of rooms in a house).

HOUSEHOLD

A household is defined as a person or group of persons who normally live together, eat from the same pot and recognize a particular person as the head.

HEAD OF HOUSEHOLD

A usual resident member of the household who is acknowledged by the other members of the household as the household head.

HOUSE (STRUCTURE)

A free-standing building that can have one or more dwellings for residential or commercial use. Residential houses can have one or more dwelling units (e.g. a single house or an apartment).

DISABILITY

Disability is an impairment that may be physical, cognitive, sensory, developmental, or some combination of these that results in restriction of an individual's ability to participate in what is considered normal everyday life.

ORPHAN

An orphan in the EVD module is defined as a child under 18 years who has lost at least one biological parent.

KEY FINDINGS

I. POPULATION CHARACTERISTICS

1.1 Population Size and Composition

Size and Distribution

Sierra Leone recorded a total population of 7,092,113 for the 2015 Population and Housing Census (PHC). This comprises a household population of 7,076,119, and an institutional population of 15,994. By type of residence, the 2015 PHC reveals that 4,187,016 people live in the rural areas (59.0%), and 2,905,097 people live in the urban areas (41.0%).

At the district level, the population figures are as follows:

- **Eastern Region:** Kailahun – 526,379; Kenema – 609,891 and Kono – 506,100.
- **Northern Region:** Bombali – 606,544; Kambia – 345,474; Koinadugu – 409,372; Port Loko – 615,376 and Tonkolili – 531,435.
- **Southern Region:** Bo – 575,478; Bonthe – 200,781; Moyamba – 318,588 and Pujehun – 346,461.
- **Western Area:** Western Area Rural – 444,270 and Western Area Urban – 1,055,964.

The population by chiefdom is presented in the Annex.

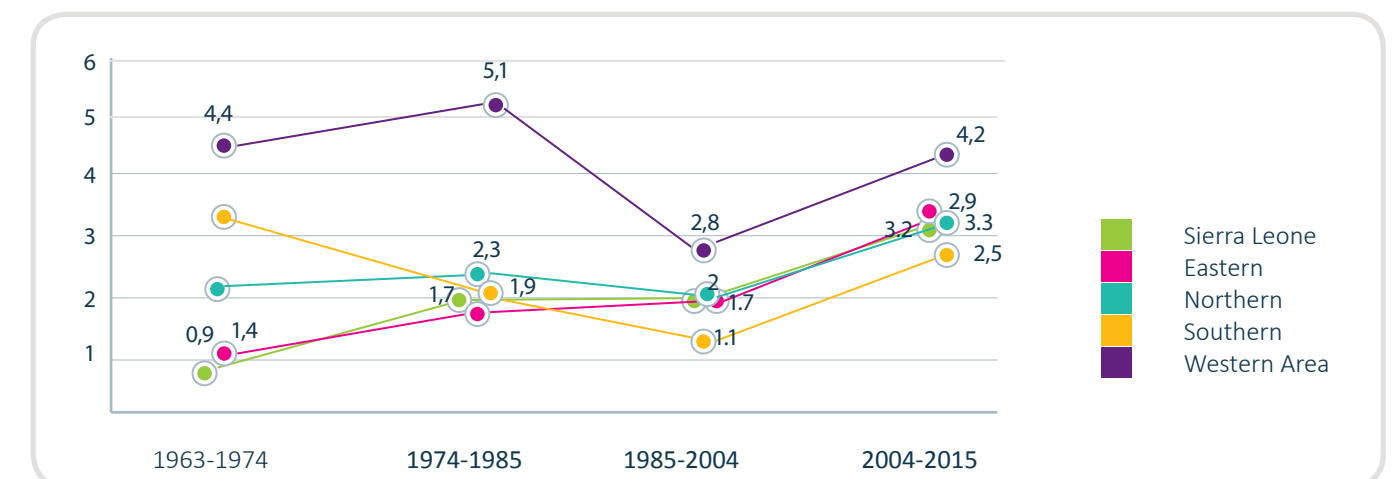

Population Growth

Sierra Leone's population has been on the increase since 1963 census. It increased from 2,180,355 in 1963 to 2,735,159 in 1974 and 3,515,812 in 1985. From 2004 to 2015 the population has increased from 4,976,871 to 7,092,113, representing an inter-censal percentage increase of 42.5%.

The average annual growth rate between 2004 and 2015 is 3.2 percent, compared to 1.8 percent from 1985 to 2004 and 2.3 percent from 1974 to 1985. The relatively low growth rate from 1985 to 2004 (1.8%) could be attributed to the 11-year civil war.

At the regional level, the growth rate followed the same pattern since 1963 as shown by figure 1.1. Between 2004 and 2015, the growth rates per region were as follows: Eastern Region -2.9 percent; Northern Region - 3.3 percent; Southern Region - 2.5 percent and Western Area - 4.2 percent.

Figure 1.1: Annual population growth rates from 1963-2015 by region

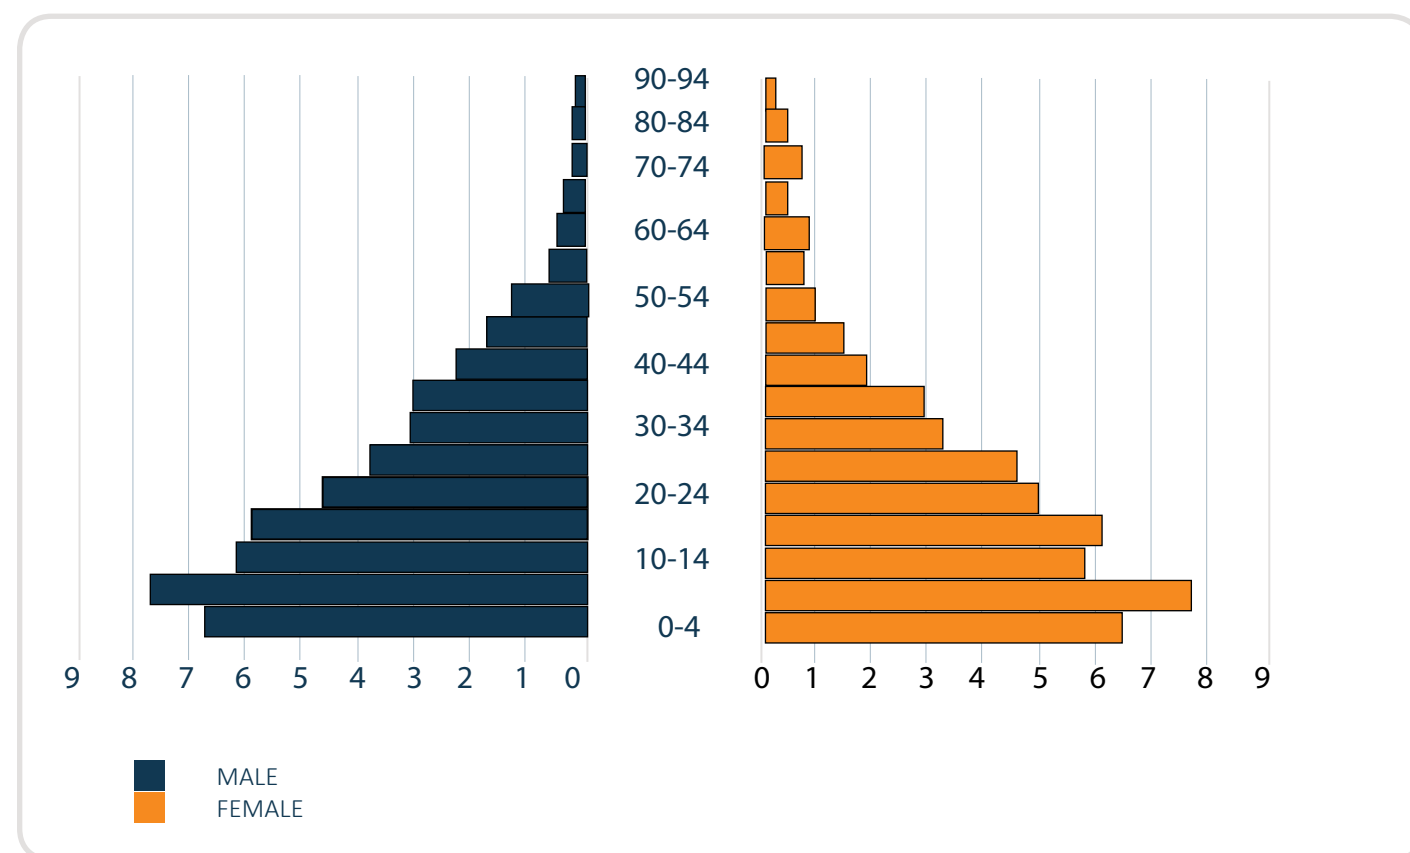

Age and Sex Structure

The 2015 PHC results reflect the demographic profile of a young population, where 40.9 percent are less than 15 years, and only 3.5 percent are 65 years and above. The working age population (15-64 years) represents 55.6 percent.

The population age-sex structure is shown in the population pyramid below. As expected in a country with high levels of fertility and mortality, the age-sex pyramid at national level has a relatively broad base. The first two age groups, 0-4 years and 5-9 years, account for 13.3 percent and 15.7 percent of the total population, respectively. The percentage share of the population by the various age groups decreased in succeeding years.

Figure 1.2: Population pyramid

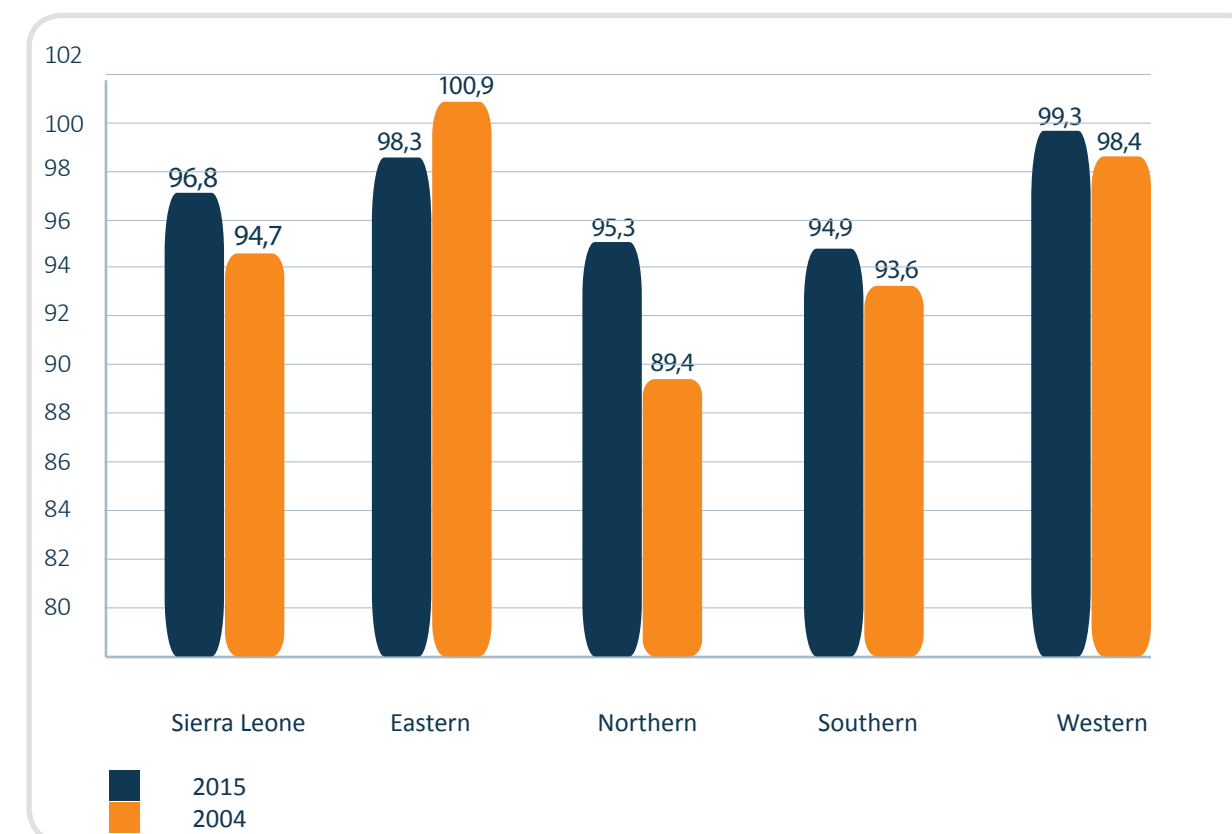

However, the pyramid reveals a deviation from the expected pattern, where there is a relatively lower proportion of the population in the 0-4 years age group than in the 5-9 years age group for both sexes. The trough at age 0-4 years could be due to high infant mortality and low fertility levels as a result of the Ebola outbreak during the 12 months preceding the census.

Sex Ratio

The sex ratio at national level for 2015 is 96.8 males per hundred females, compared with 94.7 in 2004. At the regional level, the sex ratio for the Eastern Region is 98.3; Northern Region 95.3; Southern Region 94.9 and Western Area 99.3.

Figure 1.3: Sex ratio by region in 2004 and 2015

1.2 Sociodemographic characteristics

Nationality

The results show that out of the 7,092,113 persons who spent Census night in Sierra Leone, 99.4 percent are Sierra Leoneans and 0.6 percent are non-Sierra Leoneans.

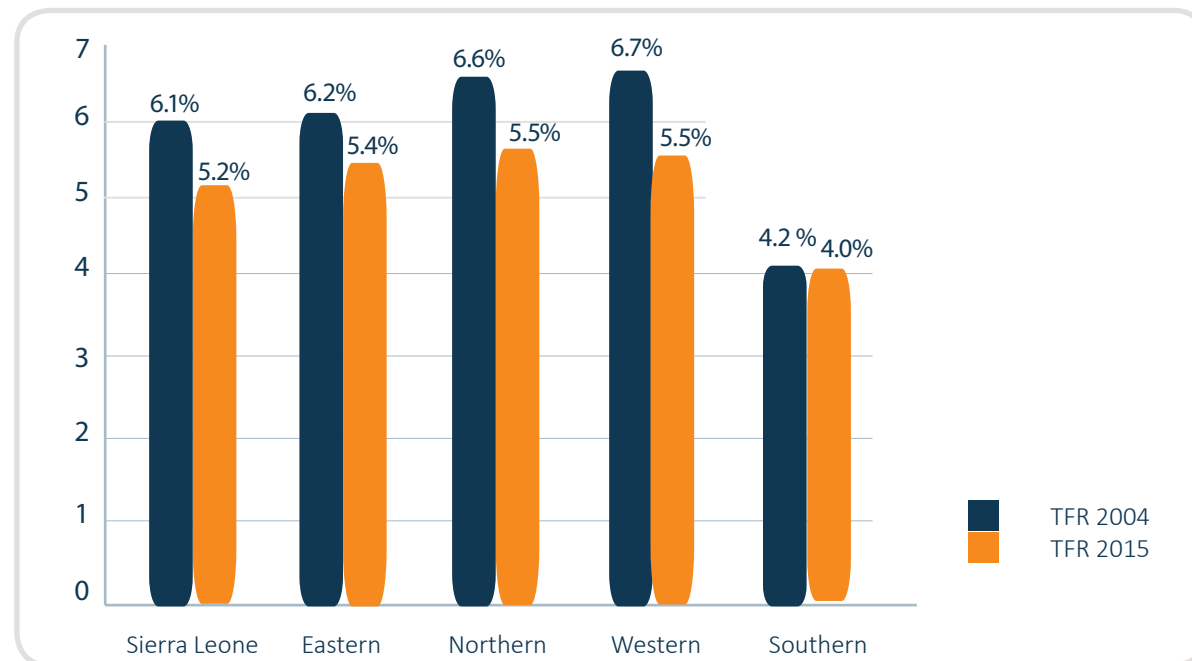

Marital Status

The 2015 PHC results reveal that 30 percent of the population 10 years and above at the national are in polygamous marriage, 13 percent in monogamous marriage and 45.9 percent never married. The male population 10 years and above is more likely to be never married (53.1%) than their female counterparts (39.1%). The female population is almost 8 times more likely to be widowed (7.0%) than the male population (0.9%).

Fertility

The total fertility rate (TFR) is estimated at 5.2 children per woman, compared to 6.1 in 2004. At the regional level, the TFR is estimated at 5.4 children per woman in the Eastern region, 5.6 in the Northern region, 5.5 in the Southern region and 4.0 in the Western Area.

Figure 1.4: Total fertility rates per region in 2004 and 2015

Orphans

The results show that 16.1 percent of the household population has lost both parents at the national level, while 4.3 percent and 18.0 percent had only father or mother alive respectively. The proportion of persons who have lost both parents is similar across the regions, although the Northern region seems to have a higher proportion of orphans (16.6%) than the other 3 regions. Females are more likely to become orphans (16.8%) than males (15.3%).

Disability

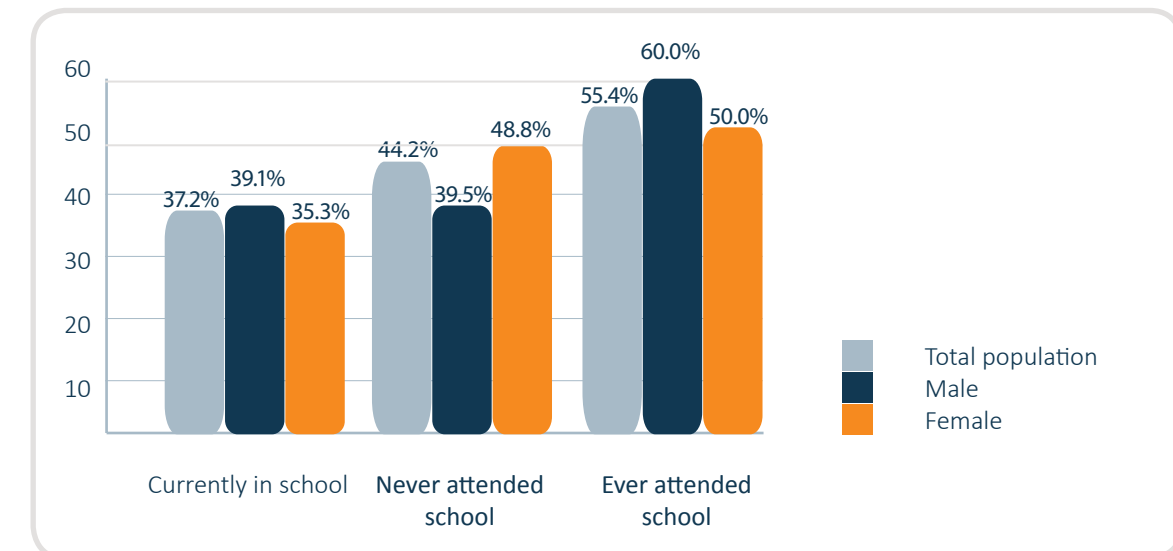

The 2015 PHC results indicate that 93,129 persons are disabled, that is 1.3 percent of the total household population, compared with 2.4 percent in 2004. By sex, 54.0 percent of disabled are male and 46.0 percent are female. By region, 27.5 percent of the disabled population live in the Eastern region, 35.3 percent in the Northern region, 24.4 percent in the Southern region and 12.8 percent in the Western Area.

1.3 Education and Literacy

School attendance

The 2015 PHC reveals that out of the 6,589,838 people aged 3 years and above, 55.4 percent have attended school and 44.2 percent have never attended school. Whereas of those persons 3 years and above who ever attended school, 37.2 percent are currently in school. The percentages of males currently in school (39.1%) and those ever attended school (60.0%) are more than their female counterparts (35.3% and 50.9% respectively). The percentage of the population that has never attended school in rural areas (32.7%) is almost three times more than those in the urban areas (11.5%).

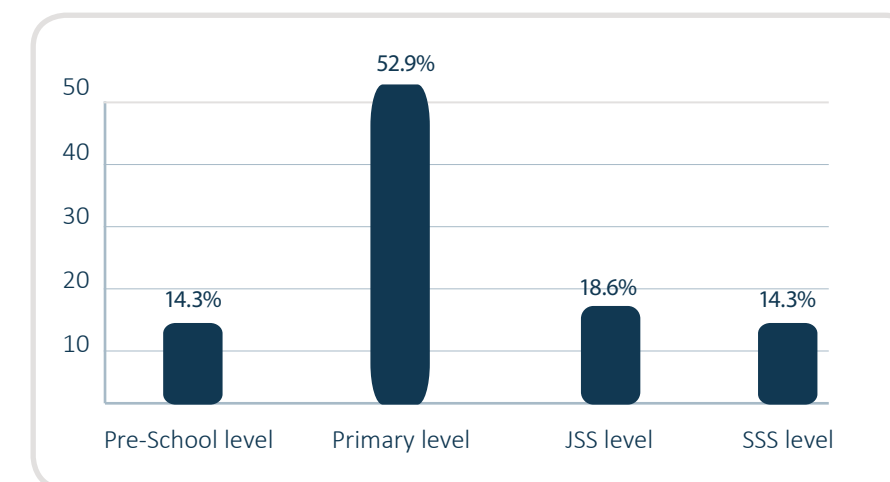

Figure 1.5: School Attendance for Population 3 years and above

School Enrolment

As shown in figure 1.6, the primary level accounts for more than half (52.9%) of all pupils enrolled in the four school levels; followed by JSS level (18.6%); SSS level and pre-school (14.3% each).

Figure 1.6: Enrolment by School level

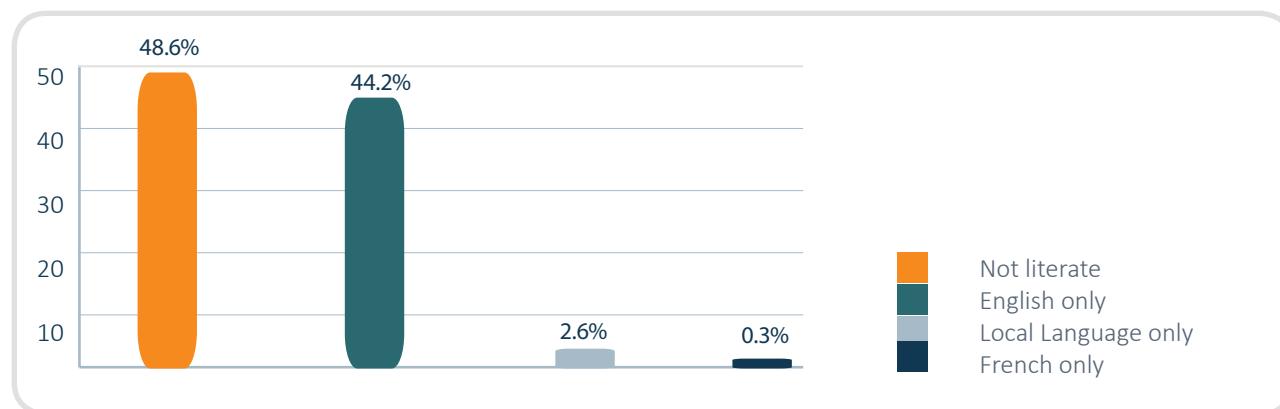

Enrolment Rates

The Gross Enrolment Rate (GER) for primary level is 105 percent, whilst the Net Enrolment Rate (NER) is 65 percent. At the SSS level, the GER is 48 percent and the NER is 14 percent.

Literacy

Figure 1.7 shows that out of the population aged 10 years and above, 51.4 percent are literate in any language. The literacy rate for males is 59.4 percent, compared to 43.9 percent for females. The results also show that 44.2% percent are literate in English Language only, while 2.6 percent are literate in a local language, and 5 percent are literate in two or more languages.

Figure 1.7: Literacy Rates of Population 10 years and above

At the Regional level, the literacy rates are: Eastern Region – 47.5 percent; Northern Region 42.2 percent; Southern Region - 45.2 percent and Western Area - 74.5 percent.

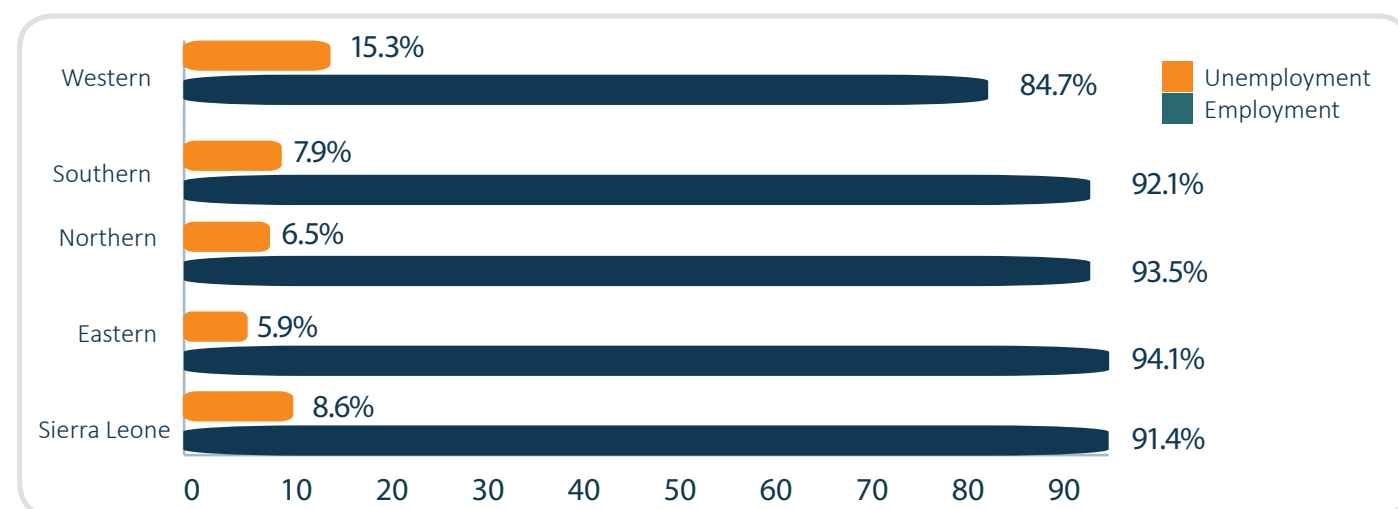

1.4 Economic characteristics

The results show that 68.6 percent of the working age population (15-64 years) are economically active, known also as the labour force (employed and unemployed), and 31.4 percent are non-economically active.

Employment Rate

Figure 1.8 shows that 91.4 percent of the labour force are employed, and 8.6 percent are unemployed. The employment rate is almost the same for male and female, 91.5 percent and 91.3 percent, respectively. At the regional level, the employment rates are: Eastern Region - 94.1 percent, Northern Region - 93.5 percent, Southern Region - 92.1 percent and Western Area – 84.7 percent.

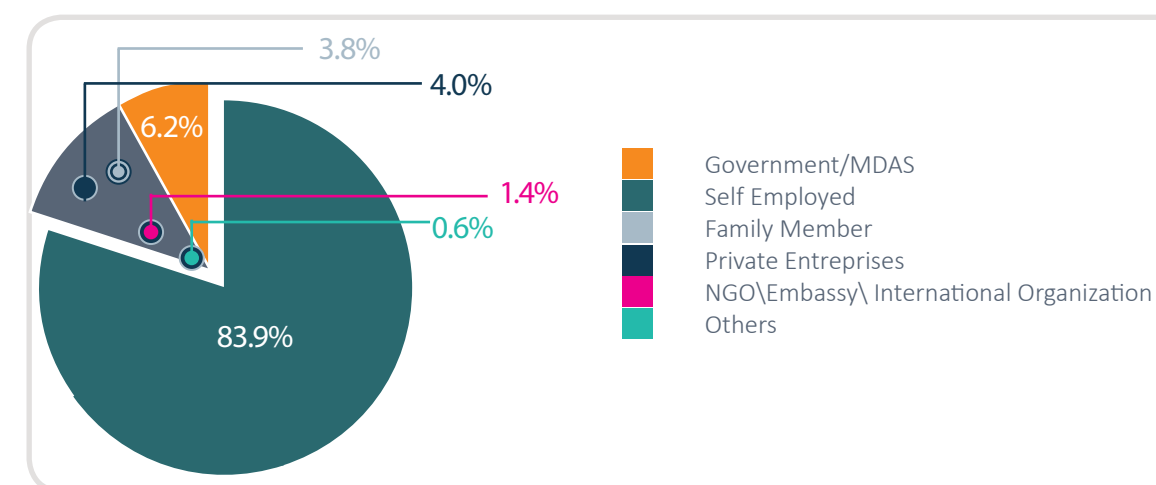

Figure 1.8: Employment and Unemployment Rates

Employment Sector

Figure 1.9 shows that the self-employment sector is the largest employer in the country, accounting for 83.9 percent, followed by public sector - 6.2 percent; private sector - 4.0 percent; family member – 3.8 percent; NGOs/Embassy/International Organisations - 1.4 percent and others - 0.6 percent.

Figure 1.9: Employment sector

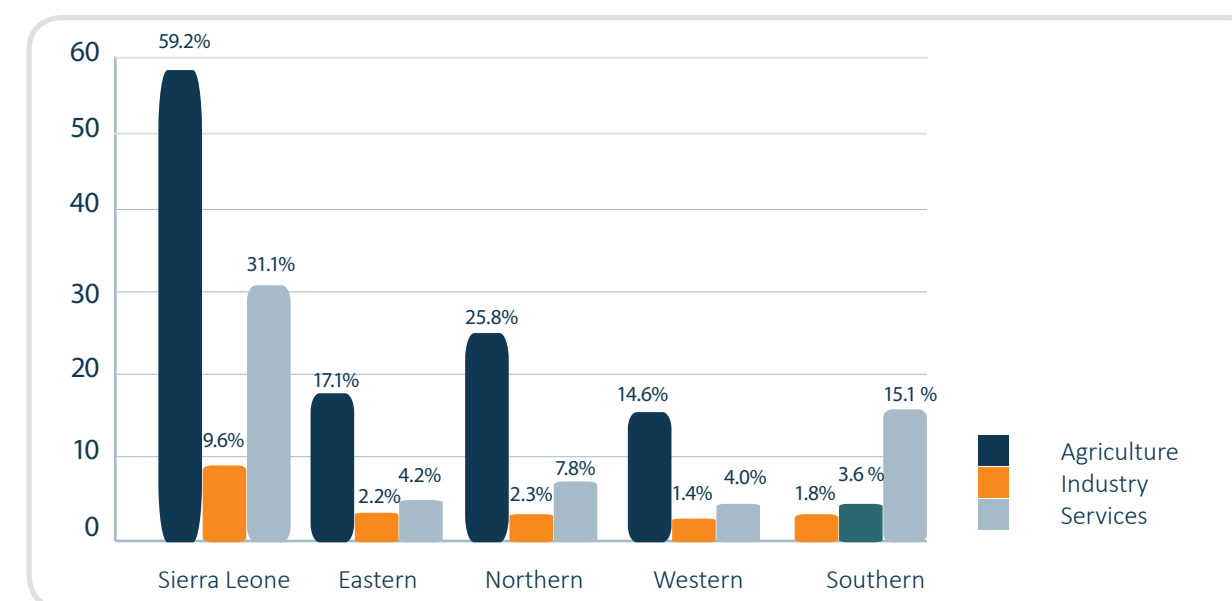

Industry

Figure 1.10 reveals that agriculture - including forestry and fishing, crop farming, and animal production - is the largest industrial sector, employing 59.2 percent of the employed population. The next major industry is services at 31.1 percent, followed by industrial (manufacturing, utilities, construction and mining) accounting for 9.6 percent.

Even though agriculture is the most predominant industry, data shows some variations in the proportions at the regional level. As shown by figure 1.10, of those engaged in agriculture, 25.8 percent are in the Northern region, 17.1 percent are in the Eastern region and 14.6 percent are in the Southern region. Western area, however, accounts for 15.1 percent of the employed population engaged in services.

Figure 1.10: Employment by Industry

1.5 Other socioeconomic characteristics

Birth Registration

The data shows that out of the total household population, 43.1 percent have birth certificates, 45.1 percent for males and 41.1 percent for females. In general, possession of birth certificate decreases with age; 65.1 percent of 0-4 years have birth certificate compared to 8.2 percent of population 75 years and older.

Immunization

The data indicates that out of 1,180,795 children aged 0-5 years, 54.0 percent are fully immunised, 38.6 percent partially immunised and 1.4 percent were never immunized at the national level. The data shows almost no difference between boys and girls in immunisation status.

Tobacco and Alcohol Intake

The data shows that out of the 5,030,016 population 10 years and over, 9.1 percent took tobacco only, 3.5 percent took alcohol only, 2.6 percent took both tobacco and alcohol and 83.4 percent took neither tobacco or alcohol. For 1.5 percent, the respondent did not know. The data shows also that 12.7 percent of the male population took tobacco only, while 4.5 percent took both tobacco and alcohol. For female population, 5.6 percent took tobacco only and 0.8 percent took both tobacco and alcohol.

Internet Access and Use

The data shows that out of the population 10 year and over, 651,826 people have access to internet, that is 13.0 percent nationwide. Male population has a slightly higher access (16.0) than female population (10.0%). Of those who have access to internet, 72.9 percent have access at home, 5.8 in the office, 2.8 percent from Internet café, and 5.8 from other sources, whilst 12.7 percent did not use Internet during the reference period (past one week preceding the census).

1.6 Ebola Socioeconomic impacts

Sierra Leone was hit by an unprecedented outbreak of Ebola Viral Disease (EVD) for 18 months, May 2014 – November 2015. Thousands of people were affected by the disease, which also had a devastating impact on the country's economy and its health system. The 2015 PHC collected a wide range of data on the EVD socio-economic impacts. This section presents a brief summary of the results.

Households with EVD Cases

The results show that out of 1,265,468 households nationwide, 6,951 reported to have at least one member confirmed positive of contracting EVD, representing 3,765 households in the rural areas and 3,186 in the urban areas. At the regional level, 22.0 percent of the affected households live in the Eastern region, 48.4 percent in the Northern region, 8.0 percent in the Southern region and 21.6 percent in the Western Area.

Persons confirmed positive of EVD

At the national level, 13,575 persons were reported to have contracted the EVD. At the regional level, 2,983 persons were reported to have contracted the disease in the Eastern region, 6,566 persons in the Northern region, 1,090 in the Southern region and 2,936 in the Western Area.

Orphans due to EVD

The data reveals that 6,499 children nationwide below the age of 18 years have lost at least one biological parent due to the EVD outbreak. The number of reported orphaned children due to EVD per region are: 1,657 in the Eastern region, 2,922 in the Northern region, 873 in the Southern region and 1,047 in the Western Area.

II. HOUSING CHARACTERISTICS

2.1 Housing conditions

Stock of houses

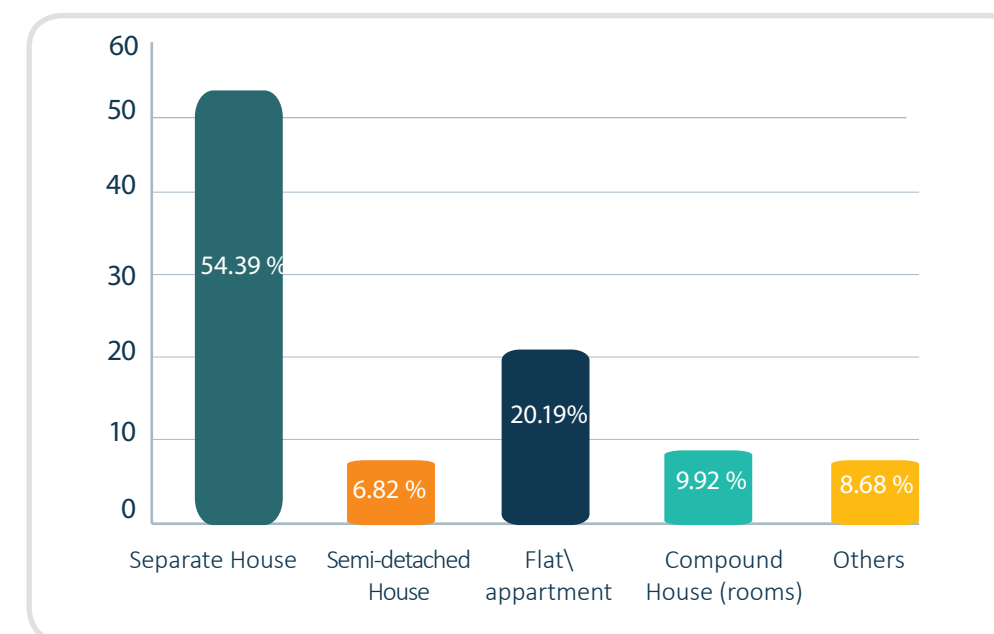

The 2015 PHC results reveal that the total stock of houses in the country is 801,417. The proportion of houses in rural areas (60.6%) is higher than that in urban areas (39.4%). The regional distribution shows that Eastern region counts for 21.8 percent of the stock of houses, Northern region 34.3 percent, Southern region 22.7 percent and Western Area 21.1 percent.

The population per house is 8.8 persons and ranges from a low of 7.9 persons in the Southern region to a high of 9.4 persons in the Eastern region. On average, Sierra Leone has 1.6 households per house and ranges from a low of 1.4 in the Southern region to a high of 1.9 in the Western Area.

Dwelling Unit

The data indicates that the total number of dwelling units nationwide is 1,347,231, of which 94.0 percent are occupied and 6.0 percent are vacant. As shown by figure 2.1, more than half (54.4%) of households live in separate house, followed by flat/apartment (20.2%), compound house (9.9%), semi-detached house (6.8%) and the rest - including huts, tents, improvised homes, uncompleted buildings, etc. - accounting for 8.7 percent.

Figure 2.1: Proportion of Households by type of dwelling units

A similar pattern is observed in the rural and urban areas. According to the data, separate house is highest with 37.5 percent for rural and 16.9 percent for urban areas. Following the separate house is the flat/apartment with rural and urban accounting for 8.3 and 11.9 percent respectively.

Construction Materials

Wall

The common material used for the construction of walls nationally is mud bricks with 43.3 percent, followed by cement blocks (25.0%), mud & wattle (15.1%), clay bricks (7.2%), zinc (6.1%) and the rest accounting for 3.4%. In the rural areas, the data shows that mud bricks accounts for 55.0 percent, followed by mud & wattle (25.2%), cement blocks (7.0%), clay bricks (6.6%), zinc (2.7%) and others (3.5%). In the urban areas, the predominant material used for construction of walls is cement bricks representing 21.1 percent, followed by mud bricks (12.7%), zinc (4.6%) and clay bricks (3.5%).

Roof

The use of zinc for roofing is highest nationwide with 81.6 percent, followed by thatch (13.3%), asbestos (2.0%), concrete (1.6%) and the rest accounting for 1.4%. The data also shows that the use of zinc is high in rural (73.3%) and urban (92.1%) areas, followed by thatch (23.4%) in rural areas and concrete (3.2%) in urban areas.

The data shows that zinc is the highest material used for roofing across the regions (Eastern 85.9%; Northern 80.5%; Southern 68.3%; and Western 90.2%). This is followed by the use of thatch (Eastern 10.5%; Northern 15.8%; Southern 28.3%; and Western 0.4%) with the exception of Western area where the use of other materials such as concrete, tarpaulin, asbestos, tiles, etc. is more prominent than that of thatch.

Floor

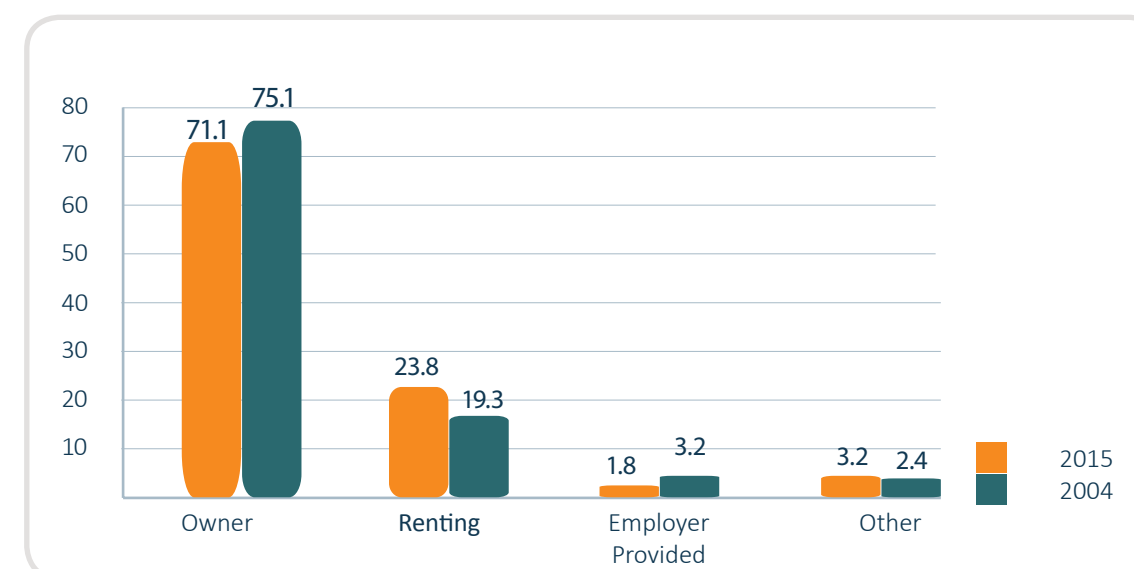

The use of mud floors nationally is 46.4%, followed by cement (44.0%), tiles (6.4%) and others (3.2%). In the rural area, 74.4 percent of floors are made of mud, followed by cement (21.2%) and tiles (0.8%). In the urban areas, 72.0 percent of the floors are cement, followed by tiles (13.3%) and mud (12.0%).

Tenure Status

The figure 2.2 shows that 71.1 percent of dwelling units are owned by households, which is a 4.0 percent reduction from 2004. Employers provided 1.8% in 2015, compared to 3.2 percent in 2004. Renting increased from 19.3 percent in 2004 to 23.8 percent in 2015. Other tenure status, including squatters, housing corporation, and quasi-government, increased from 2.4 percent in 2004 to 3.2 percent in 2015.

The pattern is similar regionally, with the Eastern region showing 78.4 percent of dwelling units occupied by owners, Southern region (82.3%) and Northern region (84.5%). Western area is different with more than half renting (54.1%).

Figure 2.2: Tenure status in 2004 and 2015

Occupancy

The data indicates that 29.2 percent of the households occupy one room, 25.7 percent two rooms, 18.2 percent three rooms, 12.8 percent four rooms and 13.6 percent five to nine rooms. Households occupying ten rooms and above account for only 0.6 percent. In the rural area, 22.5 percent of households occupy one room, 25.0 percent two rooms, 20.4 percent three rooms, 15.0 percent four rooms and 16.6 percent five to nine rooms. In the urban, 37.5 percent of households occupy one room, 26.5 percent two rooms, 15.5 percent three rooms, 10.0 percent four rooms and 9.8 percent five to nine rooms.

Source of Water

The data shows that 36.3 percent of households use pipe-borne water as a main source of drinking water, while 35.7 percent use other protected sources, such as borehole or protected wells, or protected spring, and 28.0 percent of households depend on unprotected water sources. For domestic purposes nationally, about two-thirds of households (64.8%) use protected sources of water while 35.3% use unprotected sources.

In the Eastern region, 41.7 percent of households use pipe-borne water as principal source for drinking, 32.7 percent use other protected sources and 25.6 percent use unprotected sources. In the Northern region, 20.3 percent of households use pipe-borne water as principal source for drinking, 37.8 percent use other protected sources and 41.8 percent use unprotected sources. In the Southern region, 28.3 percent of households use pipe-borne water as principal source for drinking, 34.7 percent use other protected sources and 37.0 percent use unprotected sources. In the Western area, 58.3 percent of household use pipe-borne water as principal source for drinking, 36.4 percent use other protected sources and 5.3 percent use unprotected sources.

Source of Energy for Lighting

The data reveals that 76.4 households use battery/rechargeable light as the main source of lighting, followed by NPA/BKPS with 17.8 percent. The use of other sources (wood, kerosene, generator, solar, gas and candle) accounts for 5.7 percent.

In the Eastern region, 5.9 percent of households use NPA/BKPS as the main source of energy for lighting, 89.6 percent use battery/rechargeable light and 4.5 percent use others. In the Northern region, 6.6 percent of households use NPA/BKPS as the main source of energy for lighting, 85.7 percent use battery/rechargeable light and 7.7 percent use others. In the Southern region, 6.3 percent of households use NPA/BKPS as the main source of energy for lighting, 89.0 percent use battery/rechargeable light and 4.7 percent use others. In the Western Area, 51.7 percent of household use NPA/BKPS as the main source of energy for lighting, 43.2 percent use battery/rechargeable light and 5.1 percent use others.

Source of Energy for Cooking

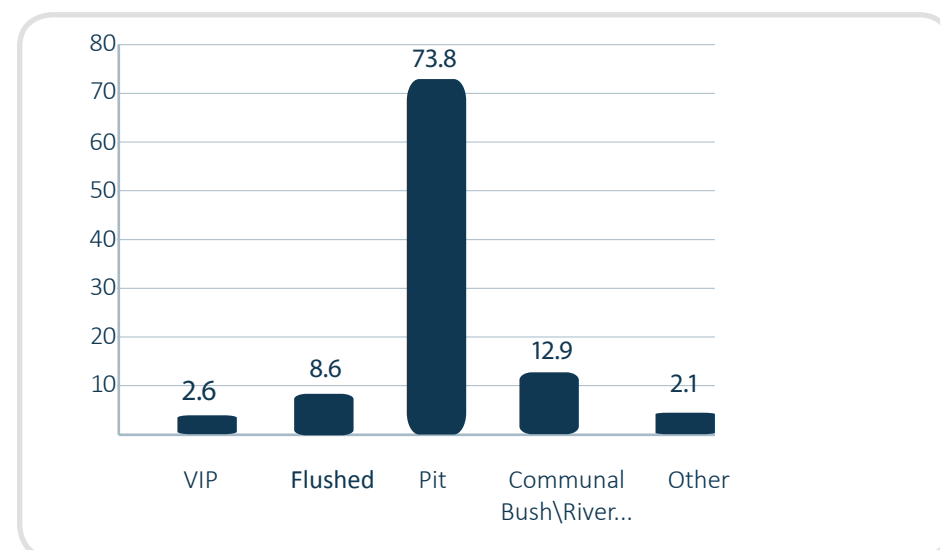

Of the various types of energy available for cooking, 64.7 percent of households are using wood, followed by charcoal (32.1%). The other sources, including gas, kerosene, electricity, etc. accounts for 3.2 percent.

In the Eastern region, 17.1 percent of households use charcoal as the main source of energy for cooking, 81.6 percent use wood and 1.4 percent use other sources. In the Northern region, 15.2 percent of households use charcoal as the main source of energy for cooking, 83.0 percent use wood and 1.8 percent use other sources. In the Southern region, 11.3 percent of households use charcoal as the main source of energy for cooking, 87.0 percent use wood and 1.7 percent use other sources. In the Western region, 83.3 percent of households use charcoal as the main source of energy for cooking, 8.9 percent use wood and 7.8 percent use other sources.

Toilet Facilities

The data indicates that 73.8 percent of households use pit latrines, followed by flush (8.6%), communal bush and river bed (12.9%), and ventilated improved pit latrines (2.6%). Other facilities including bucket and others account for 2.1 percent.

Figure 2.3: Type of Toilet Facilities

In the rural areas, the use of pit latrine (73.3%) is followed by the use of communal bush/river bed (20.8%), but in the urban areas, the use of pit latrine (74.5%) is followed by the use of flush (17.5%).

In the Eastern region, 2.6 percent of households use VIP, 2.9 percent use flush, 79.1 percent use pit, 13.4 percent use communal bush/river bed and 2.0 percent use others. In the Northern region, 1.8 percent of households use VIP, 3.7 percent use flush, 84.1 percent use pit, 8.6 percent use communal bush/river bed and 1.8 percent use others. In the Southern region, 2.7 percent of households use VIP, 3.2 percent use flush, 60.1 percent use pit, 30.8 percent use communal bush/river bed and 3.2 percent use others. In the Western Area, 3.4 percent of households use VIP, 24.2 percent use flush, 66.6 percent use pit, 4.1 percent communal bush/river bed and 1.7 percent use others.

Refuse Disposal

The data reveals that at the national level, 83.4 percent of households use safe means of refuse disposal (collected, burnt, buried and deposited in bins), whilst 16.6% use unsafe means (dumped anywhere and others) to dispose refuse. At the regional level, safe refuse disposal is practised by 87.7 percent of households in the Eastern region, 78.0 percent in the Northern region, 82.3 percent in the Southern region and 87.6 percent in the Western Area.

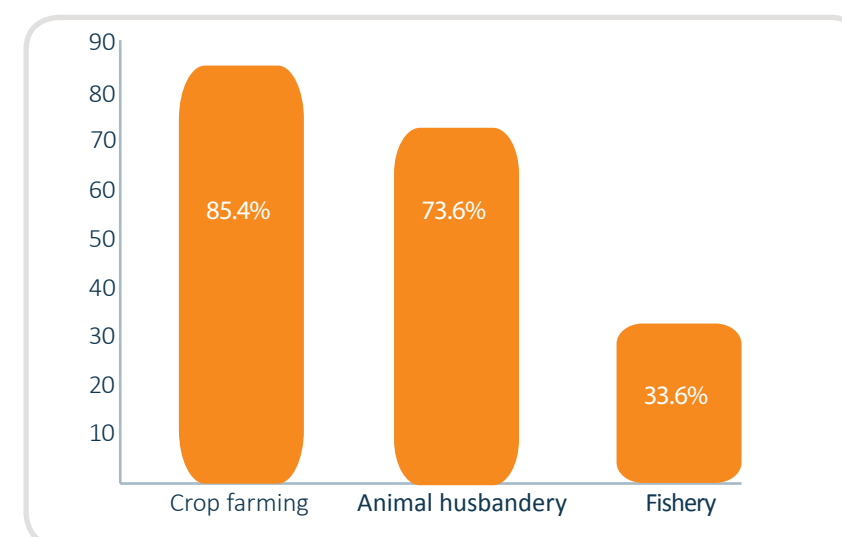

Ownership of Assets

The data indicates that at the national level, 81.2 percent of households own a bed, 66.0 percent own a radio, 62.9 percent a mobile phone, 29.7 percent a charcoal iron, 19.8 percent a television, 14.6 percent a sofa (set chairs) and 10.3 percent a refrigerator/freezer.

2.2 Household Agricultural Activities

The 2015 PHC reveals that there are 732,461 agricultural households, accounting for 57.9 percent of the total households in the country. Out of the 732,461 agricultural households, 625,679 (85.4%) are engaged in crop farming activities, 539,304 (73.6%) are engaged in animal husbandry and 245,957 (33.6%) in fishery.

Figure 2.4: Percentage distribution of agricultural HH engaged in agricultural activities by type

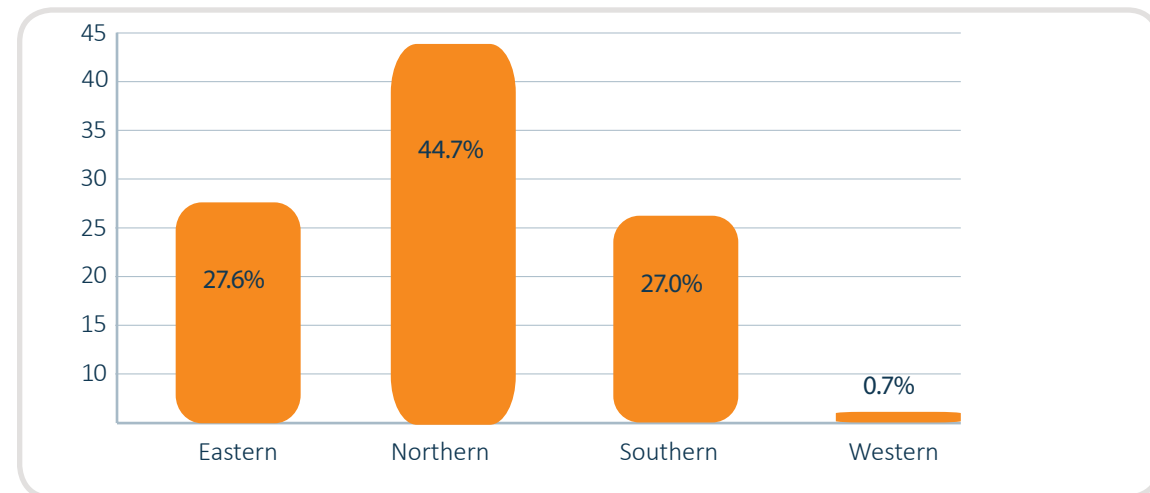

The results also show that 86.1% of households in rural areas are agricultural households, compared to 23.3 percent in urban areas. At the regional level, the analysis shows that 74.8% of households in the Northern region are agricultural households, followed by Southern region with 73.4%. The Eastern region accounts for 72.3% of agricultural households and the Western Area 62.9% of agricultural households.

Crop production

Figure 2.5 presents percentage distribution of total agricultural households' production of crops in metric tons, for both cash crops and food crops. Results shows that a total of 871,693 metric tons (MT) were produced nationally for the 2014/2015 agricultural season.

Regional distribution indicates that the Northern region with 389,996 MT (44.7%) reported the highest production, followed by Eastern region with 240,186 MT (27.6%) and Southern region with 235,465 MT (27.0%). The Western Area recorded the least with 6,045 MT (0.7%).

Figure 2.5: Percentage distribution of production of crops by regions in Metric tons

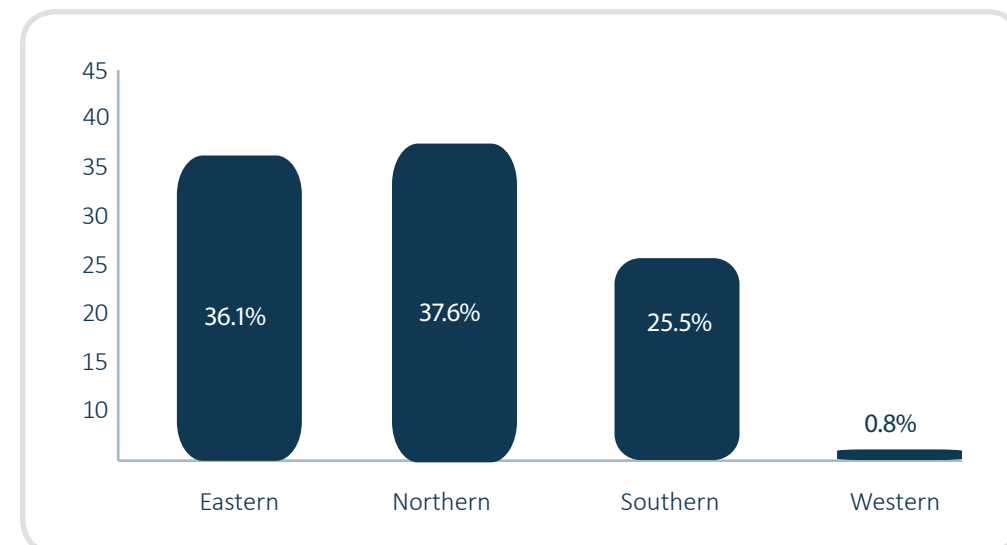

Area Cultivated

The figure below shows the area cultivated with various food and cash crops. A total of 1,297,686 hectares (ha) were cultivated in 2014/15 agricultural season; this represents 24.2% of the estimated land under cultivation in the country.

Regional distribution indicates that the Northern region with 488,131 Ha (37.6%) had the highest area under cultivation, closely followed by the Eastern region with 468,236 Ha (36.1%), whilst the Southern and Western regions had the least, with 330,326 Ha and 10,992 Ha, accounting for 25.5 percent and 0.8 percent respectively.

Figure 2.6: Percentage distribution of area cultivated per region

Livestock production

In Sierra Leone the total livestock production is as follows: 4,316,349 (65.2%) are chicken, 814,269 (12.3%) are goats, 574,706 (8.7%) are sheep, 465,817 (7.0%) are cattle, 396,103 (6.0%) and 57,877 (0.9%) are ducks and pig respectively.
